

ImpactJS Presentation

David Leonard

City College of New York

September 17, 2014

What is a game engine?

- ▶ Just a collection of algorithms

What is a game engine?

- ▶ Just a collection of algorithms
- ▶ Exposes functionality for use

What is a game engine?

- ▶ Just a collection of algorithms
- ▶ Exposes functionality for use
- ▶ Not a point and click tool

Why ImpactJS?

- ▶ Collision handling
- ▶ Camera pluginss
- ▶ Map Editor
- ▶ Player Physics
- ▶ Strong OOP Design

JavaScript Types

► strings : "Hello World"

JavaScript Types

- ▶ strings : "Hello World"
- ▶ number : `var x = 45`

JavaScript Types

- ▶ strings : "Hello World"
- ▶ number : var x = 45
- ▶ boolean : var flip = true

JavaScript Types

- ▶ strings : "Hello World"
- ▶ number : `var x = 45`
- ▶ boolean : `var flip = true`
- ▶ function
- ▶ array : `var arr = [1, 2, 3, 4]`

JavaScript Types

- ▶ strings : "Hello World"
- ▶ number : var x = 45
- ▶ boolean : var flip = true
- ▶ function
- ▶ array : var arr = [1, 2, 3, 4]
- ▶ object : person = { name: David, Age: 23 }

JavaScript Types

- ▶ strings : "Hello World"
- ▶ number : var x = 45
- ▶ boolean : var flip = true
- ▶ function
- ▶ array : var arr = [1, 2, 3, 4]
- ▶ object : person = { name: David, Age: 23 }
- ▶ undefined : typeof person === undefined

JavaScript Types

- ▶ strings : "Hello World"
- ▶ number : var x = 45
- ▶ boolean : var flip = true
- ▶ function
- ▶ array : var arr = [1, 2, 3, 4]
- ▶ object : person = { name: David, Age: 23 }
- ▶ undefined : typeof person === undefined
- ▶ null : var x = null

JavaScript Objects

```
var person = {  
  name: David,  
  age: 23,  
  major: Computer Science  
};
```

```
person.name; // David  
person.age; // 23  
person.major; // Computer Science
```

main.js

- ▶ Require all modules

main.js

- ▶ Require all modules
- ▶ Define game classes

main.js

- ▶ Require all modules
- ▶ Define game classes
- ▶ Bind keys within Init()

main.js

- ▶ Require all modules
- ▶ Define game classes
- ▶ Bind keys within Init()
- ▶ Camera code, game logic within Update()

main.js

- ▶ Require all modules
- ▶ Define game classes
- ▶ Bind keys within Init()
- ▶ Camera code, game logic within Update()
- ▶ Draw images within Draw()
