ImpactJS Presentation

David Leonard

City College of New York

August 28, 2014

Why ImpactJS?

- Collision handling
- Camera pluginss
- Map Editor
- Player Physics
- Strong OOP Design

JavaScript Types

- strings : "Hello World"

JavaScript Types

- strings : "Hello World"
- number : var x = 45

JavaScript Types

- strings : "Hello World"
- number : var $x = 45$
- boolean : var flip $=$ true

JavaScript Types

- strings : "Hello World"
- number : var x = 45
- boolean : var flip = true
- array : var arr = [1, 2, 3, 4]

JavaScript Types

- strings : "Hello World"
- number : var x = 45
- boolean : var flip = true
- array : var arr = [1, 2, 3, 4]
- object : person = { name: David, Age: 23 }

JavaScript Types

- strings : "Hello World"
- number : var x = 45
- boolean : var flip = true
- array : var arr = [1, 2, 3, 4]
- object : person = { name: David, Age: 23 }
- undefined : typeof person === undefined

JavaScript Types

- strings : "Hello World"
- number : var x = 45
- boolean : var flip = true
- array : var arr = [1, 2, 3, 4]
- object : person = { name: David, Age: 23 }
- undefined : typeof person === undefined
- null : var x = null

JavaScript Objects

```
Name.prototype = {
    methodName: function(params){
      // this is a comment
      if(this.confirmed != null && typeof(this.
          confirmed) == Boolean && this.confirmed
          == true){
          document.createElement('h3');
          $('#system').append("This looks great");
          return false;
     } else {
          throw new Error;
        }
    }
}
```
